

CodeBaby Fact Sheet

WE SOLVE PROBLEMS

WHO WE ARE

CodeBaby leads in creating emotionally intelligent, human-focused conversational AI. Our real-time 3D avatars merge innovation, empathy, and accessibility to foster meaningful interactions, bridging automation with genuine human connection to address critical societal challenges.

WHAT WE OFFER

- **Advanced Conversational AI:** CodeBaby's avatars provide intuitive interfaces for solving complex problems, making interactions more relational and impactful.
- **Real-Time Interaction:** Patented technology ensures minimal latency for seamless, human-like conversations.
- **Customizable Avatars:** Tailored personality traits, voices, appearances, and behaviors fit diverse applications.
- **Accessible Solutions:** Device-agnostic platforms designed to be inclusive for neurodivergent and differently-abled users.

CORE APPLICATIONS

- **Education, Training, & Development:** Virtual tutors and study companions offer personalized learning experiences tailored to individual needs.
- **Healthcare:** Avatars support telehealth communication and extend access to underserved communities.
- **User Support:** AI-driven tools streamline interactions while maintaining empathetic customer or employee engagement.
- **Hospitality:** Integrated avatars create exceptional guest experiences 24/7.

KEY DIFFERENTIATORS

- **Empathy at Scale:** Our human-centric AI focuses on augmenting, not replacing, human roles to alleviate isolation and enhance engagement.
- **Rapid Deployment:** Proprietary tools reduce development timelines from months to minutes, empowering faster implementation.
- **Ethical Commitment:** We prioritize transparency and ethical development, with a focus on trust and relationship building.

VISION AND VALUES

At CodeBaby, we envision a world where technology empowers and enhances human potential, ensuring inclusivity and ethical AI usage. Our solutions aim to improve lives while building trust through transparency and responsibility.

SUCCESS STORIES

- **Sharp Literacy:** Enhanced student engagement through AI avatars, improving STEAM literacy in underserved areas.
- **Big Brother:** Created two holographic avatar characters that were used on season 26 of the long-running reality show.
- **ILAC/Global Health Initiatives:** Leveraging technology to transform healthcare delivery in developing countries.
